Re: EION +26dBm LibraPlus 5845-26 Low Power Variant Discontinuation

Effective October 1, 2009 EION Wireless will no longer offer the Low Power +26dBm LibraPlus 5845-26 product variant. This discontinuation in **no way affects** the +28dBm variant of the LibraPlus 5845. The low power variant is being discontinued to streamline the product offering in preparation for the addition of frequency bands to the LibraPlus product portfolio.

The more powerful +28dBm LibraPlus 5845 is fully compatible with the +26dBm variant. Customers, who have purchased the +26dBm variant and are planning to expand their LibraPlus network in the future will still be able to do so using the LibraPlus 5845 +28dBm variant.

Customers wishing to place orders for the +26dBm variant may do so until October 1, 2009.

Availability of accessories for the LibraPlus 5845; which include power supplies, mounting brackets and antennas, is not affected by this discontinuation.

The +26dBm LibraPlus 5845-26 radio is sold under the following part numbers by EION Wireless;

9140-2302	LibraPlus 5845-26 CPE (Customer Premises Equipment) Point-to-Multipoint System
9140-2303	LibraPlus 5845-26 AP (Access Point) Point-to-Multipoint System
9140-2300	LibraPlus 5845-26 RD (Rapid Deployment) Point-to-Point System
9140-2301	LibraPlus 5845-26 ER (Extended Range) Point-to-Point System
9140-2304	LibraPlus 5845-26 LCPE (Long range CPE) Point-to-Multipoint System
