EION BYTES

The official solution update of EION Wireless

Mapping & Monitoring Solution for Wireless Networks

Map your Network

EION Network Monitoring software will help you create a network map, giving you a live view of what's happening in your network. Colour-coded status notifications tell you what's up and what's down. A variety of map layout options and icon choices help bring your unique IT environment to life.

Maximize Up Time

When there's trouble, EION Network Monitoring software sends you real-time alerts via text, email, sound, and more. You'll be able to find and fix technology issues before users or customers are impacted.
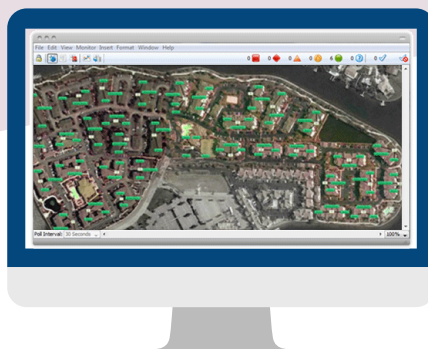

Troubleshoot Issues Faster
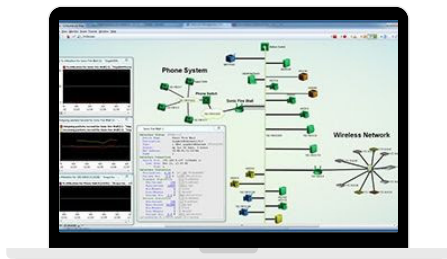

EION Monitoring will help you Spot problems across your distributed environment in seconds, not hours. You and your IT team will save time, reduce frustration, and keep customers and users happy.

Automatic Network Mapping

Automatically discover and document every IP-enabled device in your network within minutes with the network mapping software. Customize the look of your map. You can also create hierarchical maps and sub-maps to show certain network areas, Plus, users can export maps to Microsoft Visio and SVG formats.

Proactive Network Monitoring

You can monitor all your devices, interfaces, servers, and applications 24/7 by using SNMP and other protocols to continuously poll their current status. As your network map updates in real-time, color-coded icons give you an at-a-glance view for easy network performance monitoring.

Smart Alerting

Don't ever miss a critical network event. Flexible notifications alert your team when performance thresholds have been exceeded. Choose from a variety of alert options, including sounds, emails, text messages, and more. Customize the schedule, assign to a specific group, and set up escalation to ensure a response.

Network Capacity Planning

As your network grows, the EION Monitoring tool will help you analyze trends and maintain a healthy network both now and in the future. Review historic metrics, strip charts, and reports to help maximize capacity planning efforts so your network infrastructure is sure to support traffic levels of any size.

Informative Dashboard Views
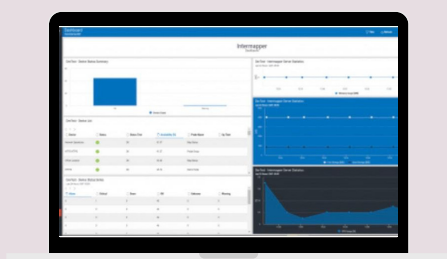

See a more holistic view of your network with dashboards to view your device matrix all in one spot. And take EION Network Monitoring on the go with a mobile-friendly interface that works on your preferred device.
